Introducing Sunekos at Glendair

If you are suffering from skin ageing, dryness, sun damage, acne scarring, dark circles under your eyes or have fine lines and wrinkles, Sunekos can help.

Sunekos restores your skins elasticity and natural volume by stimulating the production of collagen and elastin. It can be used treat areas such as your hands, décolletage, forehead, eyes, cheek and neck. The procedure has no downtime so you can immediately continue your life as normal.

For best results we recommend a course of three or four appointments and you will start to see the results after just one session. Better yet, depending on your skin, the results can last for up to six months!

“As the treatments progressed my neck began to look better and better: plumper, fresher, and less lined. Cate was wonderful, explaining everything carefully and making me feel relaxed and at ease,” says Vikki
